MONITOR, ALBERTA, FRIDAY, SEPTEMBER 8th, 1916

NO. 41

The Pioneer Store

A Large and Fresh Stock of
Groceries, Dry Goods
and Boots & Shoes,
always on hand.

Columbia Grafonolas
From \$13.00 up.
Records from 85c. up

FRESH BREAD ALWAYS ON
HAND. MONEY BACK IF
NOT SATISFIED

ALSO

FIE ROSES FLOUR

Crockery-ware Linoleum
and Rugs.

STETSON HATS ARE THE
BEST. WE HAVE THEM.

WE LEAD, WE NEVER FOLLOW.

A. J. Deadmarsh

The Pioneer Merchant

The Kennedy Drug Store
will be "Toy Land" this year.

No need to send away for toys
and other Xmas goods this
year and run the risk of being
deceived by the glittering pictures
of toys, etc., as published
by the mail order houses.

When you see our display we
guarantee that you will not be
disappointed. Everyone will
find something to suit them,
for Mr. Kennedy went East
and personally purchased the
big stock which will be on display
in all the Kennedy Stores.

Our one trouble will be in
finding enough room for these
goods, but we will string them
from the ceiling and crowd 'em
in somehow. You will be surprised
at the great variety and
range of prizes in this Christmas
stock, comprising presents for
the smallest baby to the oldest
grandmother, and all fit for a
King. Prices all the way from
5 cents to \$100. Watch for our
big "arrival announcement"
later. We carry a full line of
Kodaks and Supplies, School
Books, Stationery etc.

Kennedy Drug and Stationery Co.

The French have taken the
town of Clery.

New York transit workers
are out on strike.

Wheat is still on the up grade
reaching 1.64 yesterday, at Ft.
William.

PROHIBITION LOST OUT
IN THE YUKON BY THREE
VOTES

The results of the recent voting
on prohibition in the Yukon show that the "wets" have
a majority of three over the "drys." The election will no
doubt be contested.

WAR NOTES

The allies have started another drive on the Somme lines
and they have captured several villages, along with 5,000 prisoners,
taken in two days.

A German zeppelin was destroyed in a raid over London,
on Monday. Thirteen airships took part in the raid.

The Russians captured 19,000 men in four days, in the recent
fighting on the Galician front,

The Italians are making good
progress in Albania.

The Russian army in the Caucasus has made further gains
south of the Ellu River.

French troops have captured
the village of Omiscourt, Hospital farm, the town of Chilly.
They have also taken 6,500 prisoners, along with numerous
big guns and supplies.

Greek reservists are being called to the colors in anticipation
of that country's entry into the war.

The British have captured the
chief city in German East Africa.

British government officials
expect the war to last eighteen months yet.

Germans admit that their
lines near the Dniester have been broken by the Russians.

The Italians have captured a
German submarine in the Mediterranean.

It is now thought that Lemberg
will be taken before Kovet.

JURY DISAGREES

MAJORITY FOR CONVICTION OF EX-MEMBERS

After six weeks of hearing
evidence in the trial of Roblin,
Coldwell and Howden, ex-members
of the Manitoba government,
the jury could not agree and were discharged.

Nine were for conviction and
three for acquittal.

The case was put over until
the fall assizes.

• LADY • URSULA'S HUSBAND

BY
FLORENCE WARDEN
*Ward, Lock & Co., Limited
TORONTO*

(Continued)

CHAPTER XIV.

When the two ladies got to Oare Court, they found that they were among the few, if not the last, to rest, all in state of excitement bordering upon frenzy, and all talking at once, were gathered in the great dining-room, enjoying a substantial supper as a reward for their self-sacrifice in contending themselves with a shock.

In the midst of the general uproar, Lady Creslow was treated with special consideration, and placed at a little table at one end of the room, with the Finchdens and Lady Ursula; and as a matter of course, the bereaved Mrs. Paul Payne, some words about the loss she had sustained, which led to an explanation as inevitable as it was unfortunate.

Finchden himself, annoyed that his wife should have said anything about the pearls before a stranger, tried to make light of the matter, and professed to think they would be found. "They have probably only been mislaid," said he.

"No," persisted his wife, "they have not. Somebody must have got into the house and changed them."

But when supper was over, and Lady Ursula was bidding Lady Creslow good-night, the elder lady said in a low voice—

"That poor thing is wrong about her pearls. I'm sure Finchden doesn't claim real genius for artificial pieces. It's the work of someone inside the house; probably of one of the guests."

"Oh, no!" cried Lady Ursula, shrugging her shoulders. "It would mean dishonesty of the most shocking and premeditated sort. No, no."

The elder lady remained calm in front of her excitement.

"You will learn, later," said she sadly, "that premeditated theft is not by any means confined to burglars and housebreakers. Good night, my dear."

And she shook hands with so much kindness that Lady Ursula was touched.

"I wish," said Lady Creslow, softly, as she let her hand go, "that I had had a daughter like you. You must come and see me, you and your husband. Will you?"

"We shall be delighted," said Lady Ursula.

She was more than ever anxious that Paul should meet this dignified lady who interested her so much, and whose name appeared to have been known to him. She had asked if this was the case, and Lady Creslow had replied that it was possible her name was known to him, but that she did not remember anyone of the name of Paul Payne.

It was soon after breakfast when a fly from the station drove up to the door and Lord Easting and Paul Payne got out of it.

Lady Creslow heard the sound of wheels and she went quickly to the window of the morning-room, where she was sitting with Lady Creslow and some of the other ladies, and looked out. Then she turned, smiling, to Lady Creslow.

"How I am my usual self," she said softly, in those tones which betrayed the depth of her own feelings which had met him before. "Now you can tell me whether you have met him before."

Lady Creslow went to the window and looked out. At that very moment Paul, conceiving his wife at the window for the first time, raised his hat and smiled.

While Lady Ursula's loving eyes were still fixed upon his face, she suddenly became aware of an abrupt change which took place before her. The man had died away from her lips, and with one swift glance at the window, he had turned away abruptly. She looked at her companion, and saw that the little touch of bright pink color, which made the face of the elderly lady still look youthful in spite of her age, faded out of her cheeks and lips, leaving her ash-grey and stony still and silent.

Salve in Tubes 25c. For Books at the Firebreak
Drugstore or Marine Eye Remedy Co., Chicago.

W. M. U. 1120

And as she looked, the color faded also out of the cheeks, and the light out of the eyes, of the younger lady also.

For a few moments they remained speechless, not looking at each other. Then Lady Creslow spoke in an altered voice—

"I had no idea it was so late. I must be going," she said, taking out her watch and looking at it without noticing the position of the hands. "I must say goodbye to Mrs. Jackson, and catch the train."

She was turning back to the fire-place, where Mrs. Jackson was resting, when the fire-wells were laid, however, she came back once more to Lady Ursula, who was sitting shivering by the window. The elder lady put her hand very gently upon the shoulder of the younger one. There was a very strange look in her brown eyes almost a look of yearning.

"I hope," she said in a low voice, "that you won't forget your promise to come and see me, Lady Ursula."

"No, no! I'll come; indeed, I should like to."

Lady Creslow drew herself up. "But," she added in a different tone, graver, harder, "you must come alone."

"No," she said hoarsely.

But Lady Creslow appeared not to have heard her, and went half-way to the door, and she never looked back.

It was quite half an hour later before Paul Payne came to his wife. Lady Creslow had gone away in one of her host's cars, and Lord Easting had already greeted his sisters and asked the elder why she was so shrewdly hidden when Paul entered the room.

There was absolutely no change in him. He was just his usual amiable, courteous, careless self, handsome, well-groomed, easy-going, and apparently in the world.

Lady Ursula rose to meet him, and stood trembling by the window as he came up to her.

"Well," said he, as he kissed her, and appeared not to notice that she did not offer to kiss him in return. "I suppose you are really angry with me for not coming back in time for that famous meeting?"

"Why didn't you come back?" she asked, in a trembling voice.

"It was—that confounded brother of yours who—had me drawn—led me to the Hippodrome, in all places, if I'd been a child of six. If it had been a Horse Show, now, even—"

She cut him short. "Cut about the pearls: Mrs. Finchden's pearls?" she asked hoarsely.

She did not even look at him as she put the question. For a moment he appeared disconcerted. Then he said testily:

"Urgent Island—Galley Two . . . hasn't Finchden himself told you all about that? He was coming back yesterday?"

"Yes." He did come back. He said that he went to his solicitor, and the matter is to be referred to Mr. Jackson. He is to decide whether a detective is to be sent for here or not.

"Oh, that's all right then. And what does he say?"

"I don't know." "Haven't you asked?"

He had not even looked at her about it this morning, said Lady Ursula slowly. "What has made you so miserable, then?" demanded Paul. "I'm afraid you haven't forgotten me for throwing over that precious meeting."

Lady Ursula was silent. She did not even look at him. He touched her hands, which looked blue and cold.

"Why?" said he, "you're as cold as ice. Come nearer to the fire. You've been sitting at the window too long."

She resisted his attempt to draw her closer. Round the fireplace a group of excited ladies talked all at once at the pitch of their voices. Paul changed his tactics, and from impudent grew superlatively gentle. Nobody was taking any notice of them, so he could hold one of her cold hands in his and look down into her eyes, putting his head coaxingly on one side.

"I know," he said tenderly, "you were watching by the window for me, weren't you, Ursula?"

She nodded. "That is how you've got cold?"

There was a long pause. Then she looked up at him suddenly. Her great blue eyes were flashing with a steady fire.

"Did you see who I was with when you were watching the window?" she asked with a catch in her voice.

"I didn't notice." She drew herself erect.

"Paul, that's not true," she cried passionately.

He affected to laugh, but he was not quite in his ease.

"Well, I was not in the mood to notice anybody but you. I did see that you were not alone, and I resented the fact, you know."

He was speaking lightly, trying to put her off the scent, but she was in deadly earnest, not to be diverted from her purpose.

"But you saw who it was?" persisted she. "You—you recognized the lady. I was with—"

"I had no idea it was so late. I must be going," she said, taking out her watch and looking at it without noticing the position of the hands. "I must say goodbye to Mrs. Jackson, and catch the train."

"I saw a respectable old lady where I wanted to be, so, I wished her to the devil."

The tears were welling up to Lady Ursula's eyes. "Pan—Pan," said she brokenly, "remember, you are speaking of your mother!"

(To Be Continued.)

Trees as Snow Guards

Railways Planting Trees to Protect Lines from Drifting Snow and Sand

The railways of Canada are taking an increasing interest in the planting of trees and shrubs to secure better control of drifting snow and drifting sand; both of which interfere seriously with the operation of trains.

At Montreal, near Quebec, light drifting sand has given trouble to the Canadian Pacific Rail-

way since the very thin sod was plowed up. Hot boxes resulted to rolling stock and passengers suffered.

The old fashioned wire fence was covered by the sand, and cattle could stray out on the track. Snow fences were used to

some advantage, but in a bad season these would be almost covered up,

so that the "rescue" crews, tell the story, but he admits there is no sense of rescue about it, for nothing is done to raise the submarine from the trap until all on board are dead.

The men who are sent to the depths of the doctor claims. When a submarine strikes one of the thousands of wire nets set all around the British Isles, there is no known means of escape. Every move of the body may bring him into contact with the entangled wires. And the wires also

telegraph the capture to a naval station automatically. Then a destroyer boat hurries to the trap like a hunter who discovers that game has been caught in his deadfall. The destroyer takes a position above the submerged boat.

And the doctor is still more graphic in further description. "There is nothing to do but wait, sometimes for hours, sometimes for days. Officers and men of the way

of life are waiting in the green depths. They know that in time bubbles will come to the surface and oil will spread over the sea. The destroyer waits for the bubbles, 'death bubbles,' they call them, for a struggle of death

struggles going on in the submarine."

That may seem simple to people who never tried it, and of course an Englishman should not bother about how much an enemy of his country suffers in war time.

Surgeons are all more or less human in their thoughts, if not in their acts, and the doctor says it is frightful there over an "expiring" corps of men who are experts in the ways of warfare practised. They

know that in time bubbles will appear to the surface and oil will spread over the sea. The destroyer waits for the bubbles, "death bubbles," they call them, for a struggle of death

struggles going on in the submarine."

And you may expect to read what

the English naval men find in the German submarine. On that point the doctor says: "Men who are captured in the submarine of Skager Ræv will tell you their story, but no sailor speaks of the sights seen in a recovered submarine. Those sights make strong men weak and drive sensible men delirious with horror." They know which is not allowed even to get far as the censors. It is too horrible for the observers to talk about. And sailors are not as a rule squeamish. For that reason, some others are probably not true that the men who have been captured by the tubers have only narrowly escaped death.

Strange to say, the Queen acquiesced to the wishes of her courtiers and potatoes were not served again.

But through prejudice, may cause delays, instead of permanent.

The potato soon became recognized as an important article of food.

Opposition to its use seemed to disappear almost in a single season.

Soon housewives began to wonder

how they had ever succeeded in preparing the family dinner without the aid of the now most popular of vegetables.

The original tubers were round and

about the size of a large chestnut. In

color they were every shade between

white and black, with the exception

of green. In color, the original

example of the irony of nature. Three

hundred years of plant breeding and

selection has done much to modify

the size, shape, color and flavor of

the original vegetable. New

varieties are yet constantly appearing and

it is hard to predict to what

end of the evolution career of the

potato has yet been attained.

"Has the furnace gone out, Bridget?"

"It didn't come through here, mum."

Sold London, was a veritable Ger-

man colony, then as the wall Char-

lotte street, in particular. The Bel-

gians have lost their country for the

moment, but they have taken their

revenge in Charlotte street. There is

no gainsaying their victory there.

Instead of the cafes and restaurants

now called Belgian signs, establish-

ments are named after Belgian towns.

And there you may see Belgian soli-

con leave drinking coffee.

Netting an Enemy Under Sea Boat

Men of the British Navy Don't Like Drowning a Sub.

Men of the British navy have taken many submarines of the enemies out of their wire traps. That they

make these undersea boats and send them to torpedo other craft of the enemy is taken for granted, though it is not admitted in the official report. Wor-

cester men may have made some of

the wire in the traps which have cap-

tured the Germans. The British

navy has been looking forward to

the day when they will be eligible for

posthumous fame not upon his

ability to soothe the somewhat pe-
perty temper of his sovereign with

ships full of Spanish gold, but upon

his boldness.

The potato belongs to the same

family of plants as the deadly nightshade, which is extremely poisonous.

We know it to be a common notion in medieval times that if one member of a family were guilty of crime

the whole lot were liable for pun-
ishment. Consequently the potato

was condemned.

Could Sir Walter Raleigh have

looked forward two or three hundred years and

have seen his pet tuber taking first

place in popularity among vegetables.

He would have known that in the

twentieth century it would furnish a quarter of the food eaten by Eng-

lishmen.

The potato is put to a greater vari-

ety of uses than is any other veg-

etable. An Irishman once selected

a bushel of them as a dwelling wa-

ter, with the result that before half

year he and his antagonist ran away.

At Mrs. Abbott's select house,

they appear in various dis-

guises three times a day. In this

case, of course, they are not used for

holligreen purposes, this being con-

sidered the prerogative of the eggs

and hams.

Many thousands of bushels are

used each year in the manufacture of

alcohol. They are also fed to hogs

and cattle and are an excellent fat-

tening feed. Much of the starch

used in the laundry business is fur-

ished by the potato. Prince Ed-

ward Island is an important seat of

this industry.

This vegetable is a native of Am-

rica. It grows wild in Colorado,

and under similar conditions about

the slopes of the Andes.

It is cultivated in Spain and Mexico

in the sixteenth century. In all

probability these sailors introduced

it into their own country.

Some say it was introduced into

Ireland by St. Thomas, not and

by Raleigh, as is popularly sup-

posed. However this may be we

know that it was the latter who

first caused attention to be directed

towards it.

It is said that potatoes were intro-

duced into Ireland in 1600.

At first they met with much opposition,

but by those who did use them they

were, like Niagara Falls, very highly

spoken of.

After this Queen Elizabeth

became a convert to the use of the

potato and it was served on the royal

table. Etiquette made it impossible

for anyone to refuse to partake of

the new dish. But this did not in-

crease its popularity. Several mem-

bers of the court assembly, they

had been poisoned by the tubers and

had only narrowly escaped death.

Strange to say, the Queen acquies-

ced to the wishes of her courtiers and

potatoes were not served again.

But through prejudice, may cause

delays, instead of permanent.

The potato soon became recog-

nized as an important article of food.

Opposition to its use seemed to dis-

appear almost in a single season.

Soon housewives began to wonder

how they had ever succeeded in pre-

paring the family dinner without the

aid of the now most popular of veg-

etables.

The original tubers were round and

about the size of a large chestnut. In

color they were every shade between

white and black, with the exception

of green. In color, the original

example of the irony of nature. Three

hundred years of plant breeding and

selection has done much to modify

the size, shape, color and flavor of

the original vegetable. New

varieties are yet constantly appearing and

it is hard to predict to what

end of the evolution career of the

potato has yet been attained.

"Has the furnace gone out, Brid-

get?"

"It didn't come through here, mum."

Note and Comment

"English army officers," says
a correspondent, "are making
doubtful persons say 'squirrel'
to prove they are not Germans."

If so, we fear that most of
the Canadian soldiers will not
be able to stand the test.

Most of them will say "squirrel".

Those who thought that the al-
lied offensive on the Somme
front would soon break down
the enemy's defences and make
possible a general advance that
would drive the Germans back
into their own country, will by
this time have changed their
minds. The German failure at
Verdun has been enough to
keep down our optimism.

What reason was there to
suppose that the allies would
break right thru the German
lines, in a few weeks time, when
the Germans, after five months
of fighting and the loss of over
half a million men, failed to
reach Verdun. At the present
rate of gaining ground, it would
be years before France and Bel-
gium are cleared of the Huns.

But the Allies are sure of vic-
tory for they now have the
advantage in men, materials,
and money and they also have
command of the seas.

A German paper is authority
for the statement that 430,000
iron crosses have been given
out since the beginning of the
war. The German soldier with-
out one must be a pretty rare
bird.

Doctor—Here, go over to the
druggist and get this prescrip-
tion filled. It will cost you for-
ty cents.

Patient—Thanks, Doe, but
would you mind lending me the
forty cents?

Doctor (stormily)—Hand me
back that prescription!

Patient—Did you make a mis-
take?

Doctor (changing the formula)
—Yes, in my diagnosis of your
case. There, you can get it
filled for a dime now. The
drugs I crossed out were for
your nerves; but I see they do
not need stimulating.

If ever there were two en-
slaved nations, blindly doing the
will of their captor, they are
Turkey and Bulgaria. Outside
of Belgium and Poland, they
present the most pitiful sight
in Europe.

The Austrian general staff
having recommended that the
age for military service be ex-
tended to between eighteen and
sixty years, the ladies of Austria
had better be getting ready.

There turn will come next.

Some motorists feel that the
greatest danger on the highway
is slowing down enough so that
the police can read their num-
ber.

The kaiser has shown that he
is willing enough to do all the
talking for his nation just so
long as somebody else will do
the nations fighting.

A man in Ohio has fasted for
fifty-one days. He is bound to
get ahead of the high cost of
living, even if it kills him.

The most convincing evidence
of an approaching German de-
feat is furnished by the utter-
ances of the Germans them-
selves. They would not be
breathing sound and fury if
they were so sure of the out-
come as they profess to be.

Their attitude is too theat-
rical to be convincing. It is a
revelation, not of confidence,
but of discouragement.

Fifteen German generals on
the Somme front have been
dismissed by the kaiser, since
the allies started their offen-
sive.

What is worrying the Bul-
garians these days is whether
it will be necessary to learn the
English, French, Russian, Italian
and Serbian for "surrender"
or whether the old "kamerad"
method will do for the whole
lot.

A western woman objects to
flies being left in traps without
food or water. Pass her the
first prize in the tender-hearted
class.

Nothing adds more to the ap-
pearance of a neat, well groomed
horse than a neat, clean and
proper fitting harness. A good
farmer will pride himself on
keeping his harness in good re-
pair, and fitting his horses pro-
perly. Such negligence as al-
lowing the harness to be re-
paired with binder twine or hay
wire; or a broken trace hitched
short so as to cause the whippletree
to knock the horses heels;
hame straps so loose that the
hames will not stay on the collar
lines twisted and knotstied over
a ripple splice, or used on a
cross-line to shorten it instead
of punching a new buckle hole;
show carelessness on the part
of the owner. By keeping his
harness in repair the farmer
improves the appearance of his
farm generally, in many cases
overcomes the common trouble
of sore shoulders and chafed
sides and legs, besides winning
for himself the respect and com-
mendation of his brother farmers.
His example will likely be
followed to the great comfort
and advantage of hundreds of
horses.

The Congestion from a Bad Cold Cured Coughs Loosened Up In One Hour

Nerviline Rubbed On At Night --- You're Well Next Morning.

Nerviline Never Fails

When that cold comes, how is it to be cured? This method is simplicity itself; rub the chest and throat vigorously with "Nerviline," rub it in good and deep; lots of rubbing can do any harm. Then put some Nerviline in the water and use it as a gargle; this will ease the cough, cut out the

phlegm, assist in breaking up the cold quickly. There is no telling how quickly Nerviline breaks up a hard, chronic cough, eases a tight chest, relieves a pleuritic pain. Why, there isn't any liniment with half the power, the penetrative qualities, the honest merit that has made Nerviline the most popular American household liniment.

A large 25 cent bottle of Nerviline cures all of the whole family, and makes the doctor's bills small. Get it today. The large size is more economical than the small 25 cent size. Sold by dealers everywhere, or direct from The Catarrhzone Co., Kingston, Canada.

Giant Enemy Biplanes a Myth

Some Big Ones Built for Water, But None Have Yet Been Met

Giant German biplanes, it is officially announced by the French War Department, are a myth, and in all cases they have never been met with over the battle front. The statement adds:

"It is certain, however, that Germany has built biplanes of an exceptional size and power to be used as hydro-aeroplanes. One of 200 metres (660 feet) across, four motors and able to carry six passengers. Another, 42 metres (137 feet) across, with three motors of 200 horse-power each, is said to have been constructed at Friederichshafen and to have flown over Lake Constance. If these experiments must have had bad results, for the machine nowhere has been met.

"Aircraft of great power on service on the land front are the two-motored aeroplanes. One is the Albatros type, another C. Four across. It is steered by three rudders. It has places for an observer or a gunner and a machine gun behind the pilot, and for another gunner on the balcony of the pilot. The other type is of a similar model but more rapid in flight. The motors in these aeroplanes are of 220 horsepower."

Soldiers' View of War.

Romain Rolland publishes two letters from a French schoolmaster, now sergeant at the front, who says in one of them: "All I have seen and heard since I have been here convinces me that war can never be hated enough, and also that those engaged in warfare hate it from the bottom of their hearts. It is morally detestable." The "Polt" (the soldier) has nothing warlike about him; his greatest wish is to return home from the war and never to have anything again to do with it. I assure you that the soldiers of today are the most courageous spirits of all time. Those who will continue to do their duty, as that is necessary for peace, a victorious peace, that thought is always uppermost in their minds."—Semaine Littéraire (quoted in Vossische Zeitung).

First Girl: What's biology mean? Second Girl: Why, it's the science of shopping, I suppose.

Rising Newspaper Expenses Advance in Cost of White Paper Is Becoming a Serious Problem

Newspapers generally have assumed that the public was not interested in their business arrangements. Such an unprecedented situation has arisen, however, in connection with the cost of print paper—and for that matter, of practically everything that enters into newspaper production—that newspapers are testing the waters to see what the results of which may be obtained free upon application.—F.C.N.

Women and Asthma.—Women are much more liable to suffer from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. Kellogg's Asthma Remedy has brought relief to many a woman such.

White paper is the chief item of expense in newspapers of general circulation, and in the last few months its price has advanced 20 per cent, 50 per cent, and even in some cases 100 per cent. For metropolitan newspapers the increase is the result of production of several hundred thousand dollars a year. The advance in other materials, while not so great, is very material, and increases the gravity of the problem.

The magazines are feeling the same pressure. The "Illustrated of the World's Work," for instance, devotes considerable space to the paper situation, while "Life," the Independent and other periodicals have explained to their readers the necessity of increasing the circulation schemes because of the emergency.

Newspapers and magazines alike are doing their best to tide over the situation with no radical changes. It is only prudent, however, to recognize the fact that if the advances of the last few months continue as they seem likely to—the entire periodical business will be re-adjusted.—Kansas City Star.

When Fortune Smiled

She: "Do you remember that you once proposed to me and that I refused you?" He: "Yes, that is one of my life's most beautiful memories."

Small But Potent.—Parmelee's Vegetable Pills are small, but they are effective in action. Their fine qualities as a corrector of stomach aches are known to thousands throughout the world. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. They can be had at drug dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Catering to German Vote.

The British Government has a perfect right to protect British interests by blacklisting "neutral" firms which are known to be agents of German business houses. But it is questionable whether such extensive restrictions upon enemy trade is expedient at this time. It should be considered that there is a presidential election campaign in progress in the States at present that the thoroughly organized German vote is a strong factor in the election, and the political parties are likely to lose that vote if they are not careful. They are only having a friendly chat. They also have three kinds of tones—high, low and middle. To the old people and people above them they talk in the high tones; to the children and servants they talk in the low tone, and to their equals or among them selves they talk in the middle tone. They eat on tables about one foot and a half long and six inches high, and the women wait on the men, who receive the food, and are allowed to eat with the men, and are really only servants. They call the men their lords and masters, and the men receive all the love, if there is any, for the father gets a wife for his son, and the son rarely ever sees his wife before the wedding day.—Birmingham News.

Varieties of Grain

Farmers Should Know the Names of Seeds They Sow

Twenty per cent. of the 400 farmers visited in the Agricultural Survey in Ontario in 1915 did not know the name of any variety of grain sown on their farms. In Dundas county, where 100 farms were visited, of a total of 86 farmers growing barley only 11 knew the variety grown. Fifty-two per cent. of the 400 farmers visited in the prairie provinces were growing barley and only 16 per cent. knew the name of the variety.

Only 64 per cent. of all the farmers visited knew the name of the variety of oats they were sowing. Those who do not know the variety may be sowing varieties not suited for the farms. This is very little excuse for the prevalence of such conditions. Every farmer sowing an unknown grain lives within reach of some farmer who grows a known variety produced excellently. Farmers wishing to obtain seeds for next year should arrange for it early and choose a variety which has been tested and proved to be good. The Central Experimental Farm at Ottawa and the various Agricultural Colleges have carried on such tests for the benefit of farmers, the results of which may be obtained free upon application.—F.C.N.

Women and Asthma.—Women are much more liable to suffer from asthma by the countless thousands. In every climate they will be found, helpless in the grip of this relentless disease unless they have availed themselves of the proper remedy. Dr. Kellogg's Asthma Remedy has brought relief to many a woman such.

White paper is the chief item of expense in newspapers of general circulation, and in the last few months its price has advanced 20 per cent, 50 per cent, and even in some cases 100 per cent. For metropolitan newspapers the increase is the result of production of several hundred thousand dollars a year. The advance in other materials, while not so great, is very material, and increases the gravity of the problem.

The magazines are feeling the same pressure. The "Illustrated of the World's Work," for instance, devotes considerable space to the paper situation, while "Life," the Independent and other periodicals have explained to their readers the necessity of increasing the circulation schemes because of the emergency.

Newspapers and magazines alike are doing their best to tide over the situation with no radical changes. It is only prudent, however, to recognize the fact that if the advances of the last few months continue as they seem likely to—the entire periodical business will be re-adjusted.—Kansas City Star.

**Summer Complaints
Kill Little ONES**

At the first sign of illness during the hot weather give the little ones Baby's Own Tablets, or in a few hours he may be beyond cure. These Tablets will prevent summer complaints if given occasionally to the wild child, and will promptly cure most trivial complaints of the body. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. They can be had at drug dealers or by mail at 25 cents a box from Dr. Williams' Medicine Co., Brockville, Ont.

Korean Customs

When you first enter Korea, it just seems like a mysterious dreamland where you are asked just to walk backward to one, and when you see coming they will ask, "Where are you going?" or "What are you going to do?" And they are very polite.

The Korean people talk in a coarse, broken English, first when they hear them it sounds as though they are quarreling, but as they are only having a friendly chat. They also have three kinds of tones—high, low and middle. To the old people and people above them they talk in the high tones; to the children and servants they talk in the middle tone. They eat on tables about one foot and a half long and six inches high, and the women wait on the men, who receive the food, and are really only servants. They call the men their lords and masters, and the men receive all the love, if there is any, for the father gets a wife for his son, and the son rarely ever sees his wife before the wedding day.—Birmingham News.

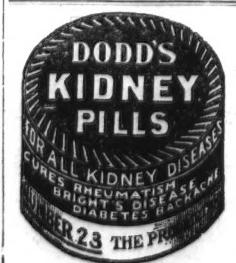

A professor at a western engineering college says that but for the occasional innovations in the applications of learning, such as the following, for instance, he would find it difficult to judge of his usefulness.

"What would be the height of a building using an aneroid barometer?" was the question asked upon an examination paper.

"One youthful aspirant answered: 'I would lower the barometer by a string and measure the string.'

Dolla: So Matthew is to marry Miss Corbridge? He's much too young for her, don't you think?

Eunty: Oh, he'll age rapidly enough after he's married.

EXCELSIOR INSURANCE LIFE COMPANY

AN EXCLUSIVELY CANADIAN COMPANY
ESTABLISHED 1890
Excelsior Policies Are Money Makers

Game as a National Asset

Game Preserves Necessary to Protect What Remains

Judging from the rate at which the wild creatures of North America are being destroyed, fifty years hence there will be no large game left in the United States. Canada, outside of rigidly protected game preserves, is therefore the duty of every good citizen to promote the protection of forests and wild life and the creation of game preserves, which is the duty of government. Every man who finds pleasure in hunting or fishing should be willing to spend both time and money in active work for the protection of forests, fish and game.

In the settled and civilized regions of North America there is no real necessity for the consumption of wild game as human food; nor is there any good excuse for the sale of game for food purposes. The operations of market hunters should be prohibited everywhere, under severe penalties.

The highest purpose which the killing of wild game and game fishes can hereafter be made to serve is in furnishing objects to overworked men for tramping and camping trips in the wilds, and the value of wild game as food should no longer be regarded as an important factor in its pursuit.—E. L. Miller, Michigan Wild Life League.

Minard's Liniment Cures Garget in Cows.

Popular Spirit in England

Some Britons are born patriots, others achieve patriotism, but the patriotic attitude holds good all the way through. Only those who have had patriotic thrust on them constitute a very small minority of the British public. Conscription is no criterion. There were less than a million eligibles left to be conscripted, the majority of whom would have volunteered. The reasons why their services were required had been freely, frankly stated. Lots of Britishers have relatives in Missouri; some more skeptical than others. The British will surely be patriotic Germany should be eliminated, Germans will find a field for their peculiar aptitudes in other countries, as well as in their own. When Greece fell, it was the Greek tutors and professors who educated the rich and powerful Romans. When Rome fell, it was the Romans who educated the rich and powerful Greeks but a land of what in the jargon of today we call "scientists." Every progressive country will welcome the able German who seeks to make a livelihood or fortune by his practical knowledge of science.

Price \$1 per box, six dragees or mailed in plain pkg. on receipt of five dollars. **WOOD'S PHOSPHODINE CO., TORONTO, ONT. (Formerly WOOD'S MEDICINE CO.)**

The Future of the Teuton

The fate of the Hohenzollern dynasty is of less importance than the future of the German people. Individuals may rise or fall, but a great nation should not perish because of the selfishness or the wickedness of a prince or of an oligarchy.

Within there are fatal defects in the German system of education there are elements in it which command universal admiration. German efficiency is no myth, no illusion. Unfortunately it has been misapplied, but when Prussian militarism has been destroyed, the ability of educated Germans will surely be developed.

Germany should be democratic, Germans will find a field for their peculiar aptitudes in other countries, as well as in their own. When Greece fell, it was the Greek tutors and professors who educated the rich and powerful Romans. When Rome fell, it was the Romans who educated the rich and powerful Greeks but a land of what in the jargon of today we call "scientists."

Every progressive country will welcome the able German who seeks to make a livelihood or fortune by his practical knowledge of science.

Those English Geographers

The London Star says of the review of Canadian troops in England: "Altogether there were nearly 20,000 of them, the pick of the manhood of Canada from the towns and prairies of British Columbia and Vancouver" which comes down to an accuracy that the Star might have added that the review was held somewhere between London and England.

"Was his father violent when you asked him for her hand?"

"Was he! Great guns! I thought he'd shake my hand off."

YOUNG WOMEN MAY AVOID PAIN

Need Only Trust to Lydia E. Pinkham's Vegetable Compound, says Mrs. Kurtzwieg.

Buffalo, N.Y.—"My daughter, whose picture is herewith, was much troubled with pains in her back and sides every month and they would sometimes be so bad that it would seem like acute inflammation of some organ. She read about Lydia E. Pinkham in the newspapers and tried Lydia E. Pinkham's Vegetable Compound. She praises it highly as she has been relieved of all these pains by its use. All mothers should know of this remedy, and all young girls who suffer should try it."—Mrs. MATILDA KURTZWIEG, 529 High St., Buffalo, N.Y.

Young women who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells, indigestion, should take Lydia E. Pinkham's Vegetable Compound. Thousands have been restored to health by this root and herb remedy.

If you know of any young woman who is sick and needs help, advise, ask her to write to the Lydia E. Pinkham Medicine Co., Lynn, Mass. Only women will receive her letter, and it will be held in strictest confidence.

Conservation of Game

Canada Taking a Prominent Part in Protection of Wild Life

A report just issued by the Commission of Conservation, "Conservation of Fish, Birds and Game," directs attention to the great value of these resources to Canada. The volume is a report of the proceedings of a conference of the Committees of Fisheries, Game and Fur-Bearing Animals of the Commission, and contains a fund of information regarding the present condition and the necessity for protection of Canada's fish, birds and mammals.

Canada is taking a prominent part in the international movement for the protection of wild life. A Migratory Bird Treaty between Canada and the United States is under consideration. Through the influence of the Commission of Conservation and other interests, bird reservations are being created, where the birds may find safe places to nest and breed.

The fur-bearing animals of Northern and Western Canada are being rapidly exterminated. This is clearly shown by the present report. To secure their more adequate protection, the Commission is advocating the amendment of the Northwest Game Act to place responsibility for its administration upon the Parks Branch, which already protects the animals in the Dominion National Parks.

The future of the fisheries of Canada is dealt with in an able manner by the highest authorities in this country. They are of great present value and recognized as also a potential value in our oceanic and inland waters which, upon development, would mean the creation of new industries. To meet this condition, the Commission is suggesting vocational training and special departments created for the fishermen, that they may take advantage of the most practical and modern methods of their calling.

The report is replete with illustrations applicable to the subject matter.

Catarhal Deafness Cannot be Cured

By local applications as they cannot reach the diseased portion of the ear. There is only one way to cure catarhal deafness, and that is by a complete removal of the mucus caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube becomes closed, the mucus accumulates and when it is entirely closed, deafness is the result. Unless the tube is restored to its normal condition, hearing will be destroyed forever.

What is an inflamed condition of the mucous surfaces. Hall's Catarrh Cure acts thru the blood.

We will give One Hundred Dollars for any case of Catarhal Deafness that cannot be cured by Hall's Catarrh Cure. Circulars free. All Drug stores.

F. J. CHENEY & CO., Toledo, O.

Two Blades of Grass."

"And he gave it for his opinion that whoever could make two ears of corn, or two blades of grass grow upon a spot of ground where only one grew before, would deserve better of mankind, and do more essential service to his country, than the whole army of politicians put together." This from the great Irishman, Dean Swift. Attila, the Hun-an ethical relation of the present Kaiser-boasted that grass never grew on ground once trampled upon by his horse's hoofs. He is not so ignorant as to encourage the other to be crushed. The Hun is again at large. While many of our countrymen are in Europe attempting to save the world from the ravages of his armies, those of us who are left behind can do no greater service to our country than to make the two ears of corn or the two blades of grass grow where but one grew before.—Montreal Family Herald.

How Japan Helped

Japanese Warships Guarded B.C. Coast in Early Days of War

Commander Denzo Mori, of the Imperial Japanese navy, in an interview at Ottawa, talked enthusiastically of the war. The commander went through the Russo-Japanese war as a lieutenant and took part in the famous blockade of Port Arthur. There is no doubt in the mind of Commander Mori that the British naval force adroitly planned the Jutland battle, despite the claims of the Germans. "I have not exact information on the matter," he said, "but there is no question of a British victory, and a very important one, too. Many of my friends, members of the Japanese navy, left Japan at the same time as I did. He went to England and I went to the United States. We went down on the Queen Mary."

Speaking of the early days of the war, Commander Mori said that the Japanese battleships did much better than we in Canada had done in the full story, in guarding the coast of British Columbia and Australia when the German ships were still at large.

Much of the munitions now being used on the eastern front by the Russians was produced in Japan, said Commander Mori. Just as in Canada and England, new factories had sprung up, so had been in Japan, and the workers were turned even half-time to munition work and even battling to the Allies.

"The Japanese people feel a great sympathy for Britain and Canada in this war," he added. "We all feel sorry at such a terrible war, but have no doubt as to final victory, and earnestly hope that it will end very shortly."

Warts are disfigurements that disappear when treated with Holloway's Corn Cure.

France Will Have Something to Say

Speculative construction of hellish nests of Europe was a diversion more in vogue at the outset of the war than it has been in the war's second year. If it was purely a futile and visionary diversion then, it surely is quite as much so now. At least events seem to say wiser heads than Joffre's blundered.

Cardinal Joffre's blood-sucking rats,

moist, power-brained trench

rats are distinctly of the opinion that

they may have something to say

themselves on the Alsace-Lorraine

question when the time for settlement at hand.—New York Sun.

Japanese Politeness

Mr. C. E. Donoloupe, the brilliant

war correspondent, who succeeded in

wiring the fullest and quickest de-

scription of the Portugal revolution

by hiring a yacht and escaping from

Lisbon to Vigo, was kept in Tokio

recently much longer than he wanted.

He was making a survey of the East, intending to reach the Russian front via Siberia, and had trouble in making the difficult journey.

He tells this story:

A Japanese policeman who had been watching me glanced furtively at a conversation handbook, and then crossed and spoke in English:

"How do you do," he said, in formal tones, "sir or madam, as the case may be?"

Animals Subject to Paralysis.

The attention which the present

epidemic of infantile paralysis has

drawn to the disease attended by

paralysis has led to the discovery

that domestic animals and pets are

susceptible to the disease.

Animals which have especially come

under suspicion as possibly distribut-

ing the germ of infantile paral-

ysis are poultry, pigs, dogs and cats.

Sheep, cattle and even horses

have been suspected. All kinds of

animals are subject to dis-

ease in which the body sometimes

appear. The paralytic diseases which

they suffer have long been known and

are quite different from infantile par-

alysis. Their occurrence may be co-

incident; in no instance investigat-

ed has one been found to be responsi-

ble for the other.—Dr. Simon Flex-

ner.

Thousands of mothers can testify

to the efficacy of Mother Graves' Worm Exterminator, because they

know from experience how useful it is.

Huns vs. Hungarians

The German press views with some anxiety the anti-German campaign which has been opened by the Magyar or Hungarian press. The leader of the anti-German movement is Schele Kosz, editor of the pro-socialist and anti-German "Buda-Pest Hirlap" and a close friend of Count Tisza, the Hungarian Premier, who, in his paper, is conducting a violent campaign against the Germanization of Hungary. This is the Hungarian censor refused to stop.

"Alack! we lack lacteal fluid," said the German Chancellor.

"We'll get milk from Cannes if I can break through the French line," said the Crown Prince.

"Or could we send our navy over and get some from Cowes," put in Von Tirpitz's successor.

He: I would die for you.

She (weirded): Well, what are you waiting for?

Work of Canadians

Volunteers From Canada Have Fought Like Veterans

The Canadian troops around Hill 60, Sancourt Wood and Zillebeke have repeated their valorous performance of the First St. Julien and Ypres. The official British statement describes their recapture of a former British position over a front of 1,500 yards to the southeast of Zillebeke as "a gallant and successful assault." They continued their advantage until they gained around Ypres; they fought throughout the night, says the report, "doggedly bombing their way back to the possession of the position they had lost."

The soldiers of Canada have bulked up in the coal mines in this European war. When they first came upon the field they were a mystery to the trained British trooper; their apparent loose discipline, their recklessness in the face of danger, their disregard of the English traditions of the field, and their disregard of the British code of honor.

He: Still told of a band of troops returning at night from the trenches that were challenged by an English sentry. Receiving no reply, the sentry excitedly repeated, "Who goes there?" None of your damned business," came from someone in the ranks. "All right, Canadians, discharge!"

We believe that the Anglo-French

strategists in this offensive movement

do not aim so much at breaking through the German defense as at

wearing down the German resistance

and capturing positions on the

eastern and western fronts the daily

toll of life is terribly great; but the

allies are willing to sacrifice men so

long as they exact equal toll from the

enemy, knowing that they can stand

the strain of war. Before

the end of the year the Germans

will not likely be so embarrassed

for want of reserves that they will

decide to shorten their lines on both

fronts in order to husband their

strength—by the shortening of their

lines of defense, increasing their

power of resistance. This alone

will make retirement necessary, and

it may be that a good part of French

and Belgian territory will be volun-

tarily evacuated by the enemy by the

end of the year.—From the Hamilton

Expecting Too Much

Defeat of Germany May Be a More Gradual Process Than

Many Expect

We see much these days, in newspapers which ought to know better, about the certainty of the British army soon smashing the German defense and forcing the German army back to the Rhine. Such talk does not serve to rouse hopes and expectation which must bring bitter disappointment and perhaps discouragement.

We believe that the Anglo-French strategists in this offensive movement do not aim so much at breaking through the German defense as at

wearing down the German resistance and capturing positions on the

eastern and western fronts the daily

toll of life is terribly great; but the

allies are willing to sacrifice men so

long as they exact equal toll from the

enemy, knowing that they can stand

the strain of war. Before

the end of the year the Germans

When Buying Matches Specify "Eddy's."

Kitchener as Prophet

Foretold Early Use of Battle Formation for Aeroplanes

A story told in London relates that at the very beginning of the war the late Lord Kitchener was visiting a certain flying ground in England, and when he saw the machine gunners, flying in formation, he said to the commanding officer: "You ought to learn to fly regular formation." The officer replied that that was impossible because machines could neither travel far enough nor stay long enough in the air.

"You will have to do it, all the same," Lord Kitchener said, "before this war is over." In the opinion of airmen the suggestion was absurd at that time, but it has come true. Both by the British and the French reconnaissances carried out in balloons, aerial warfare is in fact, going through all the stages which warfare by sea went through, the development of three months being about equivalent to that of a century in the older service.

Sommers and Martin have purchased a new separator.

BIRTH—On Wednesday Aug 30th, to Mr and Mrs Wm. G. Deacon, of Spring Hill Farm, a son.

U. S. SENATE PASSES 8 HOUR BILL and railway strike is averted.

Shackleton's men have been rescued from Elephant Island, having arrived at Chile on Sunday, the 3rd.

For the first five months of the fiscal year the increase in customs revenue has been \$21,723,000, the receipts having risen from \$36,731,000 in 1915, to \$58,454,000 during this year.

FOR EQUALITY IN PENSIONS

The following resolution was passed by the Village Council and a copy sent to the government.

"Whereas the Government of the Dominion of Canada has framed or is framing a Pension Bill to be submitted to the Dominion House of Commons, and

"Whereas the Dominion of Canada is a democratic country where class distinctions do not and should not exist.

"Be It Therefore Resolved that the Village Council of the Village of Monitor memorialize the Dominion Government that in the granting of pensions for wounds received by Canadian soldiers during this world-wide war, that Officers and Privates be treated on an absolute equality."

This resolution was first passed by the City Council of Niagara Falls, and they have asked all other municipalities in Canada to do likewise.

It is pointed out that the Canadian army is a cosmopolitan one and has been recruited from every walk and avenue of life and that in thousands of instances the officers are the superiors of the privates only through the accident of war.

In private life they are equal.

While performing military duty the officers are paid in accordance with the responsibilities of the duties which they discharge. So likewise with the privates. But when they return to private life they are again on an equal basis and should be treated as equals.

If unfortunately an officer should lose an arm, and if unfortunately a private should lose an arm, the loss of that arm to the private is just as great, if not a greater handicap to the private than it is to the officer in the struggle for existence in the days that are to come. In making these statements there is absolutely no desire or intention to criticize our gallant officers, but a desire to see to it that our equally gallant privates get their just dues. We want to see officers and privates alike get everything which a generous and grateful country can give them for their self sacrifice, their devotion to duty and their gallant deeds on the fields of battle.

ELECTION OF OFFICERS

The following officers were elected at the meeting of the Monitor Amusement Co.:—
L. R. Beebe, Sec'y-Treas.
J. A. Hayes, Chairman.
Board of Directors
E. T. Stewart, E. B. Purdy, and J. A. Hayes.

It is their intention to issue new stock, get more shareholders and have the hall put in good shape for the winter.

5 mares, in foal, 6 to 9 yrs. 3 mare colts 1, 2 yr old, 3 geldings. 72 head cattle, 2 good milch cows, 7, 3 yr old steers; 3, 2 yr old; 24 extra good cows: 5, 2 yr old heifers; 12 head 1 yr steers and heifers; 18 spring calves: 1 reg'd 12 yr herd bull. Pigs, chickens, ducks, harness horse blankets, all kinds of farm machinery, household goods.

Terms: 1/4 cash, \$20 and under cash, balance, a credit of 12 months will be given on joint tenement note at 8%, 5% off for cash.

Col. J. R. Whitney, Auctioneer,
Ned Dexter, Owner.

A WOMAN'S "IF..."

If you can face the sun when all the others
Are sitting with their backs toward the light.
If you can look so nice that your own brothers
Admit that you find favor in their sight.
If you can talk—and not be always talking,
Or being screamed at keep your tones quite low.
If you can do a good two hours' walking
And not complain of blisters on your toe.
If you can sing that others can endure it;
If you can cook that others can survive;
If you can flirt with Don Juan and curate,
And keep men buzzing round you like a hive.
If you can bear to see the socks you've knitted
Used by your swain to clean his motor-bike;
Or smile to see your greatest rival fitted
With just the kind of costume that you'd like.
If you can buy a hat—French "creatin'";
A hat that puts all others in the shade;
And wear the hat, and cause a great sensation—
And never tell a soul how much you paid.
If you can cry and still remain attractive;
If you can see a joke and tell one, too;
If you can hear them talk and stay inactive.
In any scandal spreading there's to do.
If you can play at bridge without revoking;
Or read a book.....and not start at the end;
If for your sake a man will quit stock broking
And forthwith start his evil ways to mend.
If you can greet with every sign of pleasure
A man who eats his gravy with his knife.
He'll be convinced that you're a perfect treasure,
And what is more...he'll take you for his wife!

—F. H. H. in the New York Sun

PUBLIC NOTICE

To Whom It May Concern:
I wish to announce to the Public that all trails on the south-half of Sec. 12-35-5 will be closed on and after the 15th day of September, 1916.

Lumber gates were erected this spring to oblige the public, yet the majority were too lazy or indifferent to close these gates. This land is now being fenced and all trails will be cut off on the above date. Trespassers will be prosecuted. Consort trail is 1 mile north.

H. L. CRISP

UNHAPPY ENDING OF GERMANY'S ATTEMPT AT WORLD DOMINATION

GERMAN DESPOTISM VERSUS MODERN DEMOCRACY

Harvard University Professor Has Issued a Denunciation of the Atrocious War Waged by the Hohenzollerns, in Which He Expresses No Doubt As To How the Struggle Will End

Over the imprint of the Houghton-Mifflin Company of Boston, and under the title "Germany versus Civilization," has just appeared one of the most effective denunciations of the "atrocious war" waged by German despotism against modern democracy.

Mr. Thayer, has long been closely identified with Harvard University, and is an historical writer of established repute. From first to last his "monograph" deals not with the military events, but with the social issues, the stakes, and the evolution of Germany which made her ready for such an attempt at world domination. With him the conclusion of the whole matter is this:

"Those of us who believe in civilization know that the condition without which permanent spiritual good can neither spring up nor thrive. In its deathless presence the Imperial lusts of the Hohenzollerns, like the Empires of those who were greater than they, are seen in their true nature: material, money, and power."

On the minds of those who have retained their essential humanity the effect of such an exposition is inevitably obsessive and depressive. The Prussianization of Germany is here traced as a process which tends to deepen the social gulf between the classes of a State that might have been a potent factor in the uplift of humanity and in the progress of civilization. So far from having been drawn in too strong colors, the sketch by Mr. Thayer might have been made still more somber by taking into view the existence of the Holy Roman Empire, for practically a thousand years before Prussia experienced her modern revival, prior to the battle of Waterloo. From that time on it became an issue between Hohenzollerns and Napoleon, which would dominate the German Empire in Europe. Bismarck and Sadowa settled the matter in favor of Prussia, and thus doomed both States to a common moral destruction. Their coalition in this unprecedented double suicide will always be the greatest of all histories.

Mr. Thayer has no lingering doubts as to how the gigantic struggle is going to end, any more than he has questionings as to Prussia's motives or as to the diabolism, of her kultur, which shuns our noble justice, freedom, pity, and charity. "Dad, whatever name kultur operates, it tends downwards. The individual who thinks himself a superman is likely to end in a madhouse or on the gallows; the nation, despite King, or hierarchy which substitutes its own selfish interest for humanity, it ends in ignominy, from humanity becomes inhuman, revives and worships standards of the Beast, and heads straight for perdition."

The part played by his own country in this awful contest for supremacy between Prussian and German civilization arouses in Mr. Thayer a feeling of contemptuous indignation that finds expression in a torrent of burning invective. He tears to shreds all plea for neutrality in the face of such alternatives as Germany's course, and demands that the absolutely unprovoked and unmitigatedly brutal treatment of Belgium, and unhesitatingly alleges that if Germany's course had not been checked in Belgium and stopped in France she would have tried to overthrow Great Britain and overrun America.—Toronto Globe.

An Invisible Clock.

A public clock which can be heard but not seen is one of London's curious possessions. It is in the tower of St. Mary Abbots' Church, Kensington, and is the only public clock in the immediate neighborhood. It chimes the quarter hours, hour, but cannot tell the minute further. It has no dial, no hands, no outward and visible sign of any kind to show that it is a clock. This eccentricity, it is explained, is the result of two causes, one aesthetic, the other functional. In 1871, when, in 1871, a clock was suggested as an afterthought, but the architect protested that it would mean the addition of 15 feet to the tower, and the risk of its cherished proportions. A second reason was that the church, having but slender funds, could not afford a clock with a dial. A compromise was arrived at by installing the works of a chiming clock in the belfry without dial or hands.

"How long did you stay in your last place?"
"Two weeks, m'm, and before I agree to come to work for you I should like to know how long you kept the last girl you had."

First Voluntary Aid: This patient's temperature is 105 degrees. What shall I do?

Second Voluntary Aid: Put him down 100. The doctor gets so nervous if it's more.

Willis: I wonder if there will ever be universal peace?

Gillis: Sure. All they've got to do is to get the nations to agree that in case of war the winner pays the pen-

Anti-Hailstorm Cannon

Used Successfully in European Countries to Protect Growing Crops

While the guns of the European nations are thundering incessantly on land killing men and destroying man's works, the grapevines of France, in their turn, are using artillery to good advantage. But theirs is not destructive artillery; they are using guns only to protect their vineyards against the destructive effects of hailstorms, which are not infrequent in the grape growing districts.

Anti-hailstorm guns cannot be said to be novelties in the strictest sense of the word, for they date back to 1860, when Austria invented them. Since who had had the opportunity of witnessing the devastation caused by hailstorms, each year in districts of his country, conceived the idea of firing a cannon shot at the clouds charged with rain and using an artillery piece to fire with them. The invention that is a result of artillery fire directed against the clouds, the threatening storm moved elsewhere before bursting, thus saving the crops in the immediate vicinity of the anti-hailstorm.

A short time later similar experiments were carried out in Italy, followed soon after by the introduction of this method of protecting grape vines and cereal crops in France. In the latter country the use of anti-hailstorm guns has been extended until today they are in general use, principally in the Poitou, Bourgogne and Champagne regions.

A representative type of the anti-hailstorm cannon is composed of four main members. First a tripod which serves to support the carriage mechanism; second, the breech-loading mechanism which receives the cartridge and explodes it by means of a striking or firing pin; third, a smoke stack or funnel which is a continuation of the breech-loading member and fourth, a sheet of iron measuring three or four meters (9 to 12 feet) long, surmounting the cannon and protecting the roof of the shed that serves as a shelter for the cannon and its operators.

We produce good bacon in Canada, but the quantity of prime available for the British market is as yet quite limited. The home market and the United States appropriate all this. There is an interesting point however, it has been found that France is, and will continue to be, a good market for our frozen meat; possibly also Italy.

This is but a brief reference to some of the chief points of Mr. Gillis' speech, which will be continued while the war lasts; there will be an increasing demand for meat of all kinds, for eggs, poultry and dairy products, particularly during the winter months.

The condensation produced by the discharge of the anti-hailstorm gun creates the hulls of the hailstorms that compose the clouds most feared by the agriculturists.

Whatever may be the merit of these theories offered in explanation of the anti-hailstorm cannon, the fact remains that the odd artillery is serving its purpose well—Scientific American.

Royal Army Medical Corps

Lord Derby, British Under-Secretary for War, said in a recent interview with a representative of the Brooklyn Eagle: "The battle of the Allies on the Somme has emphasized the terrible character of the British organization is markedly superior in every important respect to that of Germany—our hospital arrangements are superb. I believe that the work of the Royal Army Medical Corps is unsurpassed by that in any army we have in the world. Our soldiers, wounded one morning on the front in France, twenty-four hours later receive medical attention in London hospitals. Such afeat is unparalleled, and I think may be taken as a fair indication of the efficiency of our army."

The medical arrangements of the Allies are transported rapidly for long distances along the roads, while the railways are carrying large quantities of munitions, food and medical supplies toward the fighting lines. The new steel helmet has completely vindicated the opinion of the head of state that minor casualties in the Somme have been reduced considerably by the use of this device. Minor head wounds are extremely rare."

American commercial travellers in India are double in number this year as compared with last year, and they are bidding rates for general merchandise orders that "knock out" British competitors. On the other hand a large number of firms have given up their United States houses to represent that as soon as the war is over they will revert to their British shippers.

Willis: I wonder if there will ever be universal peace?

Gillis: Sure. All they've got to do is to get the nations to agree that in case of war the winner pays the pen-

About 100 species of oysters have been classified by scientists.

Britain's Meat Supplies

Unlimited Market for Canadian Produce in the Old Country

The United Kingdom in the fiscal year 1914-1915 imported, for meat and for frozen beef, from Canada \$311,000,000. Only \$81,000,000 of this came from British possessions. Out of this latter amount no less than \$16,000,000 was for frozen beef from Australia. It will be seen from this statement that England is to a large extent dependent for her meat supplies upon countries outside of the British Empire.

The Argentine sent no less than \$70,000,000 worth of chilled beef, from her beef cattle, to Canada.

Canada contributed little outside of bacon and hams. Since the war broke out there have been continuous demands for meats of all kinds. Enormous supplies have been sent forward by the Argentine, Australia, Zealand, Canada, Argentina, Uruguay. Some fairly large orders have also been placed in Canada.

With a view to studying the situation on the spot and acquiring information for the direction of Canadian production, Mr. H. S. Gillis, of the Live Stock Commission, early in the year went to England and France, and on his return prepared a report which is amongst the most valuable and suggestive articles in the Agricultural War Book, 1916. This report is also contained in Pamphlet No. 19 of the Live Stock Branch.

The shooting off of the big Russian supply has made a big opening for Canadian eggs, which will continue as long as the war lasts. After the shooting off of the Live Stock Branch.

The shutting off of the big Russian supply has made a big opening for Canadian eggs, which will continue as long as the war lasts. After

the shooting off of the Live Stock Branch.

There are a certain machine-guns produced by the hundred, every week in a factory ordered, planned, and built during the past twelve months, which have never been sent to Great Britain before 1915. The output of guns and howitzers has increased by several hundred per cent.

French arsenals have been built or adapted to produce nearly 200,000 cartridges per day.

There were 184,000 women engaged in war industries in 1914. Today there are 600,000, and the total number of war workers in 1914 was 1,198,600. Had now increased to 3,500,000. There were 471 different munition processes upon which women were now engaged.

In every branch of the Ministry of Munitions, the work of the women of the country had been placed in the nation's disposal in the great work of industrial reorganization. Some of these men had given up incomes which would make a Cabinet Minister's nose water, and were working in Valley sheds in the mud and dirt, out without a penny reward. If by a business government is meant government by business men, then we had arrived at a business government as far as the Ministry of Munitions was concerned.

For a long time," Mr. Kellaway added, "our anti-aircraft gunners had been crying out for an improved height-finder for Zeppelins, the existing height-finders being slow, clumsy, and having a margin of error of 100 feet. You see how they handicapped our gunners in their attempts to bring down Zeppelins. Three men set to work on this problem, and in two or three months they produced a height-finder which gave rapidly and exactly the Zep-pelin. It was an important discovery, but the problem was only one of hundreds which are continually cropping up."

Magnificent Work of Patrol

In a report to the Admiralty, reviewing the operations of the Dover patrol since December, 1915, and recommending numerous officers for meritorious conduct, Vice-Admiral Sir Reginald Bell-Bottoms, commanding the patrol, said that in the six months more than 21,000 merchant ships, apart from men-of-war and auxiliaries, passed through the patrol lines. Of these only 21 were lost or seriously damaged by enemy vessels.

"But to effect this security to merchant shipping," says the Admiral, "I regret that over 4 per cent. of our patrol vessels have been sunk and the lives of 77 officers and men lost to the waves."

The Admiral further notes that the patrol assists in the protection of the flank of all sea transports to and from the British army in France, and that this vast transport has been so thoroughly safeguarded that not a single life has been lost during the sea passage.

A Slight Misunderstanding

The girl's father, a gruff, stout old fellow, came into the parlor at 9:30 with his watch in his hand. The young man was standing on a chair straightening a picture, that the girl had asked him to do.

"Young man, do you know what time it is?" asked father.

"Yes, sir," replied the youth, jumping down. "I was just going."

He rushed into the hall, seized his coat and hat, with father following.

As the father reached for the door, father again asked him if he knew the time.

"Yes, sir. Good night." And he left without putting his coat on.

The old gentleman turned to his daughter, in genuine consternation.

"What is the matter with that young fellow? I wanted him to tell me the time so I could set my watch."

"We dined out last night. Pa disengaged us, as usual."

"What was that?"

"He got to the end of the dinner with three forks and two spoons still unused."

PREPARATIONS OF GREAT BRITAIN TO PROSECUTE WAR TO THE END

ORGANIZATION AND RESOURCES PHENOMENAL

Weekly Output of Cartridges is now Greater by Millions than the Annual Output Before Commencement of the War, and Other Equipment Being Produced Accordingly

Mr. F. Kellaway, secretary to Dr. Addison, Parliamentary secretary of the Ministry of Munitions, has informed the House of Commons respecting the organization and resources at the disposal of the country that constitute a phenomenal accomplishment even in these modern times.

Great Britain, he said recently, with the aid of a survey made by the Treasury of the Allies, had now become their armory.

There are now scattered up and down the country some 4,000 controlled firms producing munitions of war.

Many arsenals have been built or adapted to produce nearly 200,000 cartridges per day.

The tides are about to be tied down to labor at Wolfville, Nova Scotia,

a development company has made a

survey on the water of the Bay of Fundy with a view of developing a tide-water project at Cape Split.

An American expert in hydraulic production of electricity has the scientific

guidance of that expedition.

Americans are too proud to develop such

tides as they have for power, it

may be expected that this man on a foreign tide may get results to

us up in the Bay of Fundy.

The tides are famous for their ups and downs as

the revolutions of Mexico, if not

more so. A current motor recently

experimented with in the Gaspe River,

was twelve feet long and two

feet wide, and it is reported

to have developed power at the tide rose which reached a maximum of two horse-power by the time the machine was submerged.

The later experiments at Cape Split are

said to have shown that motors developed

30 horsepower were in a tidal current

which ran nine miles an hour.

As the machine is made like a crab,

it takes advantage of the tide, going

as well as coming in.—Worcester Telegram.

On the Battlefield

Sensations of a Soldier in the Thick of the Fight

Referring to the feeling of a man on the battlefield, an officer of the 13th Canadian Scottish, who has returned, said:

The idea of being killed never affected me in the slightest, and I know many a man who was never good at sports, and who had no nerve whatever, who made a cracking good soldier. My theory is that you're never so good a character as when you're under fire together.

You seem to be a different person. I remember standing up at that show on the 19th of April when a shell came along and literally strewn on a hedge the man who was standing beside me fell. You don't feel the sense of fear, never, only a slight after-taste if you are up and doing something you don't mind the shells at all, but if you have to lie in the trench there are occasions on which everybody is scared peacock, and the man who says he is not is a liar.

"A man was a good deal in the trench," continued the officer, "and his greatest need seems to be water rather than food. The men usually get more food than they can eat.

The water is not very good, even to the taste, but it is delicious. France is such a highly cultivated country that the wells are practically sunk in manure piles. To this taste is added various substances which the doctors claim render the water harmless. It may be so, but it doesn't smell like it."

Germans Show How Wind Blows

Cheap editions of Shakespeare and Dickens' works are being printed and circulated in Germany. Commenting upon the mysterious fact the "Frankfort News" says: "Let us not forget that peace will come, that the world will be better off, that the News does not say by whom," and that for this purpose mutual belles-lettres will provide a medium which should not be under-estimated. Especially suitable for this object will be the works of authors who do not directly speak to us of events of our own era."

The Mayor of Munich has again

said that the state of affairs in his

city is "most, revolting . . . I

have been asked to refrain from giving full expression to these facts on the ground that the enemy may rejoice. I don't care what the enemy knows. The trouble is that the German people do not know what is taking place in their very midst."

Joke Was On Hun Colonels

An amusing proof of the element of surprise in the French attack is furnished in a story which reached Paris recently from the Sante-Croix district.

A German colonel one morning

was peacefully shaving in his dugout when his orderly shouted down: "The French are coming!"

The colonel said the German equivalent of "Tell that to the horse mar-

shaws," and on laconically replying, "Ten minutes afterwards," with a good German sense of humor, he told the story to his French captors.—London Times.

Mrs. Youngbride: I'm getting our ice from a new man now, dear.

Youngbride: What's wrong with the other man?

Youngbride: The new dealer says he'll give us colder ice for the same money.
